HEALTHCARE PROJECTS ARE DISTINCT

Healthcare projects have unique needs. We understand that it's not business as usual for the construction industry and projects must work around the requirements of the client. Our seasoned staff are experts in the meticulous planning and phasing of projects to allow for the needs of the patients and their care. We effectively communicate with all parties concerned including doctors, nurses, administrators, directors and other hospital staff. We take all appropriate measures to ensure the safety of both the public and staff. Our jobsites are orderly and are cleaned regularly.

Ocala Regional Medical Center
Performed projects both large and small spanning over 8 years.

INFECTION CONTROL

Patient safety and care is a top priority for any healthcare provider. We take infection control seriously. Our staff uses the latest techniques to reduce the risk of infection and any potential harm to patients including the use of specialized equipment and procedures. We understand the need to keep up with the latest ICRA requirements and update our protocols accordingly.

BUDGETS AND DEADLINES

Time is money. No more so than for the critical areas of healthcare facilities. In light of this, we go to great lengths to ensure the deadlines of all our projects are met and turned over to staff on time. We are budget conscious and know that looking out for the customer ensures a long relationship.
